ACQUIRED --NO. OF ENCLS.
(LISTED BELOW)DATE
ACQUIRED BY SOURCE 25X1CSUPPLEMENT TO
REPORT NO.

DATE OF INFORMATION [REDACTED] 25X1X

1. The center of the Hungarian light chemical industry is in and around Budapest; the most important factories in the heavy chemical industries are located around the Bakony mountains. Preparations are being made now to make another center at Vac, where they want to establish one or two light chemical industrial organizations. The most important factories in Hungary in the heavy chemical industry are the following: Peti Nitrogenmuvek, Fuzfoi Nitrokemia, Peremartoni Robbanoszergyar, Papkeszi Robbanoszergyar, Hungaria Vegyimuvek in Budapest. Out of these, the Peti Nitrogenmuvek was considered in 1951 as tops, and Nitrokemia was second.
2. The most important light chemical factory outside of Budapest is in Budszentmihaly. Its name is Alkaloida Vegyigyar, and it has 800 workers. In 1951 it was considered as tops. In Budapest, the "Vegyigyarakat Letesito Nemzeti Vallalat", (National Organization for the Establishing Chemical Factories), was established at V Mador utca 18. Its purpose and duty is to plan and find sites for those chemical factories that are planned in the five year project.
3. The nationalization of the Hungarian chemical factories took place partly in 1947, at the same time when the banks were nationalized, partly on March 25, 1948, when there was a general nationalization of industrial plants. Several of the plants were considerably changed after their nationalization; some were enlarged, the smaller ones were merged and the production was specialized.
4. After the factories were nationalized, all nationalized plants were classified by the government in May 1948 in five classes (A, B, C, D, E). The evaluation of the classification was done on the basis of the following chart:

58

25X1A

CLASSIFICATION SECRET/US OFFICIALS ONLY

SECRET/US OFFICIALS ONLY

25X1A

- 2 -

Classification of the industrial plants and cooperatives:

Conditions of classification:	A.	B.	C.	D.	E.
	Over				
1. Number of employees	5000 persons	1000-5000	500-1000	100-500	Under 100
	Over				
2. Total of capital investment and working capital	105 million Forint	45-105 million Forint	10-45 million Forint	2-10 million Forint	Under 2 million Forint
	Over				
3. Cost price of the production of the year 1947	100 million Forint	48-105 million Forint	10-43 million Forint	2-1/2-10 million Forint	Under 2-1/2 million Forint
	Over				
4. Value of total business of the year 1947	105 million Forint	48-105 million Forint	11-48 million Forint	2-1/2-11 million Forint	Under 2.5 million Forint

To be classified in any one of these five groups, a factory has to meet at least three of the above conditions. In case of seasonal works, the yearly average is to be considered.

Based on the above chart, the classification of the chemical industry is as follows:

Class A.

Peti Nitrogenmuvek (Nitrogen Plants of Pet).

Class B.

B-1 Chinoin Gyogyszer es Vegyeszeti Termek Gyara (Chinoin Factory of Medicine and Chemical Products) Ujpest, To utca 1-3.

B-2 Magyar-Amerikai Olajipar R T (Hungarian-American Oil Industry Inc). This company belonged to the concerns of the Standard Oil of New Jersey.

B-3 Shell Koolaj R T (Shell Rock Oil Company), Budapest, X. Gyomroi ut 132. This was also an American concern.

Class C.

C-1 Albus Szappan es Olajgyar (Albus Soap and Oil Factory), Budapest, X. Gyomroi ut 6-12.

C-2 Dr Lazar es Dr Offner Vegyeszeti es Movenyolajgyar (Drs Lazar and Offner Chemical and Vegetable Oil Factory), Ujpest, Vaci ut 71.

C-3 Magyar Altalanos Gyufaipari R T (Hungarian General Match Industry Co).

C-4 Magyar Petroleumipari R T (Hungarian Rock Oil Co).

F-47 Victoria Vegyimvek (Victoria Chemical Factories), XI. Fehervari ut 56.

5. After the nationalization of the factories, there were very many changes made in their names. The old names were kept mostly only in those cases where the already established export connections were of importance. For instance in the pharmaceutical field: Chinoin, Richter factories.

6. Another reason for the change in the names of the already established factories was the mergers, specializing of production, etc.

SECRET/US OFFICIALS ONLY

SECRET/US OFFICIALS ONLY

25X1A

- 11 -

7.

The names of some factories are completely deceptive, and it is impossible to guess what they really manufacture, thus, their production is completely covered up. [redacted] several machine and textile factories have their own chemical plants which produce in excess of their own necessities. The chemical plants of such factories have a much larger capacity of production than what they use themselves.

25X1X

25X1X 8.

[redacted] establishing, discontinuing, specializing of factories, etc, is still permanently in process.
